DETAILED ACTION

Response to Amendment

1. This office action is in response to amendment filed on 05/30/2008.
2. Claims 2-9 are currently pending. Claim 1 has been canceled.
3. Objections to Drawings, Specification, and Claims are withdrawn.

Allowable Subject Matter

4. Claims 2-9 are allowed.

The following is a statement of reasons for the indication of allowance:

The prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed invention having the following limitations, in combination with the remaining claimed limitations.

- **As in claim 2:** wherein the writable block size is a predetermined integral multiple of a size of an erase block in the flash memory, the predetermined condition is that the write block size is an integral multiple of the writable block size, and the controlling unit performs the control operation to write data into the flash memory only if the predetermined condition is satisfied;
- **As in claim 9:** a host apparatus that transfers data to and from the memory card, wherein the host apparatus includes a read-modify-write unit operable, when a size of a first data to be written into the memory card does not reach the writable block size, to (a) read a second data from a flash memory that is included in the

memory card through the external interface unit, and (b) put the first data and the second data together to generate a third data so that the third data has the same size as the writable block size, and then (c) transmit a write command to the memory card to write the third data into the flash memory.

Conclusion

5. Bechtoisheim (US 4,435,792) teaches a host system comprising a read-modify-write unit 12 and 14 to combine new data and read data from a memory device 18, then rewrite the modified data back to the memory device. However, Bechtoisheim is silent about the combined data having the same size as the writable block size.
